

Exchange meeting “Open your heart”

Theme of the first meeting “Let’s talk about child care”

The exchange meeting was held on June 25. We discussed about “Difference of schools in Japan and foreign countries.” The good news is that many participants gathered. A professor and a student studying abroad at Saitama University, a teacher of Kawagoe Technical Evening High School, Japanese language teacher dispatched from Saitama prefecture, a professor of Nihon Fukushi University, and Japanese teachers for foreign children. Many of foreign mothers and their children, who are the main guest for the day, also gathered at FICEC. 18 participants gathered at this meeting.

★Reason of opening this meeting at FICEC

At FICEC we have been supported foreigners for 20 years or more and we have been worried about some cases. Foreigners who come to life consultation to FICEC seem to be difficult to enter real Japanese society. Why can't they become self-sustaining? Why do they just rely on other people? Don't Japanese accept them at once? Or is there any invisible wall between Japanese and foreigners?

When I was teaching Japanese language at elementary school and junior high school in Fujimino city, the principal said “A Chinese student went back to his home country with his parent without any notion to school. He came back after two months, when the lunar New Year ended. The student does not understand Japanese well and cannot study if he does not come to school.”

In many cases, foreign parents in Japan call their children from their home country. But such children do not understand Japanese. When they enter to school in Japan, many problems will come out, as a matter of course. Therefore, to solve such problem, I thought it is a good idea to have exchange meeting and exchange opinions.

★Opinions of foreign mothers at the meeting

Club activities in Japanese school is very strict, relation of seniors and juniors is very strict and it seems like an army. In China and Thailand, children live in dormitory and are well brought up at school. In Japan, parents are very busy for class visits and Parent-Teacher Association activities. Japanese mothers are very strong and looks like a super woman. My Japanese husband expects me to be the same as a Japanese mother but it is very hard work.

In nursery school, children just play around and they don't study there. I am very anxious about it.

★Next exchange meeting

I came from Taiwan. I like the word “When in Rome, do as the Romans do.” Why don't you live like this in Japan? Then I think you can enter real Japanese society and can be used to Japanese customs and rules. Japanese people should also open your mind and accept such foreigners. Now all the world is going to create a peaceful society without discrimination. For the next exchanging meeting, please check Facebook and website of FICEC.

The theme is “International marriage”. Is international marriage good for you or bad? Please join our meeting.
